

MA'ADEN SULPHURIC ACID PLANT PROJECT *Raz Al Zavr - Jubail / SAUDI ARABIA*
Ma'aden (Saudi Arabian Mining Company)

Construction Period 32 Months (Oct 2007 - May 2010)

Project Description Consists of 4 main sections: 3 sulphuric acid production plants, each with the capacity of 5,000 tons/day, and a common part serving to these 3 plants.

PETRO-RABIGH POLYETHYLENE PLANTS PROJECT / PC1 - PE PLANTS *Rabigh / SAUDI ARABIA*
PETRO-RABIGH - (Saudi Aramco & Sumitomo Chemical Eng. J.V. - K.S.A)

Construction Period 26 Months (May 2006 - July 2008)

Project Description Civil construction, structural steel erection, equipment installation, pipe prefabrication and erection, painting and insulation works for the reactor building, process building, emissions building, purifier & water tank structures & bins, substructure, transformer stations and the other auxiliary buildings of the two polyethylene plants which are EPPE (East Process Polyethylene) and LLDPE (Low Density Polyethylene) large production capacity of 250,000 Ton and 350,000 Ton per year respectively.

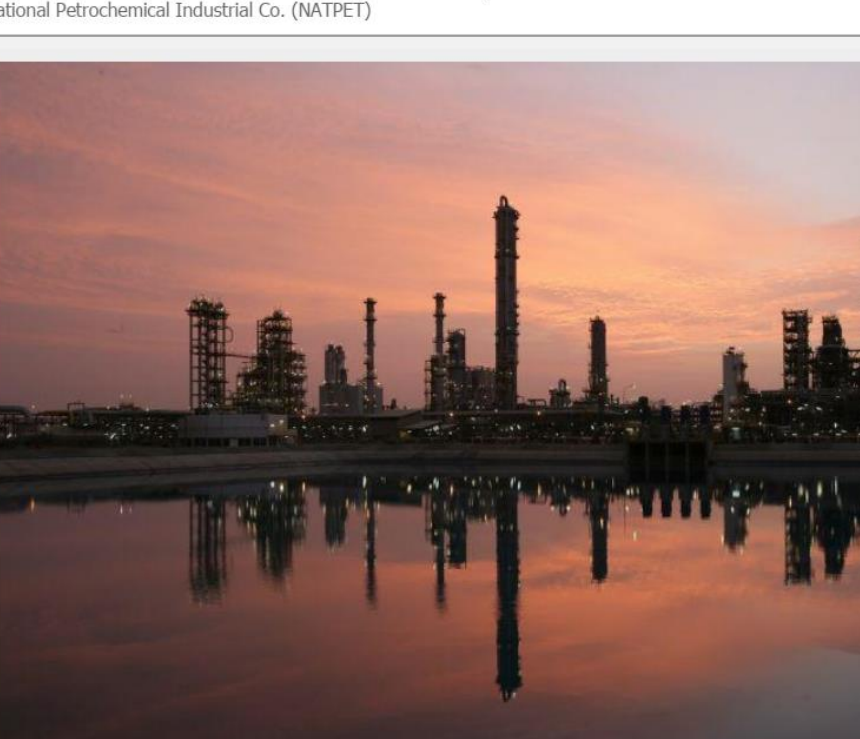

TASNEE POLYETHYLENE PLANT PROJECT *Jubail / SAUDI ARABIA*
TASNEE Petrochemicals (Saudi Ethylene & Polyethylene Company)

Construction Period 31 Months (June 2006 - January 2009)

Project Description Civil, mechanical, piping, equipment erection, painting and insulation works of 400 KTA capacity of high density polyethylene plant & 400 KTA capacity of low density Polyethylene Plant Project

NATPET POLYPROPYLENE PLANT ERECTION WORKS *Yanbu / SAUDI ARABIA*
National Petrochemical Industrial Co. (NATPET)

Construction Period 24 Months (July 2005 - July 2007)

Project Description Civil construction, structural steel erection, equipment installation, pipe prefabrication and piping, painting and insulation works for the reactor building, process building, emissions building, side house, sea water pool, infrastructure, transformer station and the other auxiliary buildings of the 400,000 Ton/year capacity Polypropylene Plant.

SAFCO FERTILIZER PLANT CIVIL CONSTRUCTION *Jubail / SAUDI ARABIA*
Saudi Fertilizer Company

Construction Period 18 Months (January 2004 - June 2005)

Project Description Civil and underground works of SAFCO IV Ammonia/Urea Project.

REVAMPING PROJECT OF NAPHTHA STEAM CRACKING PLANT *Izmir / TURKEY*
Petkim Petrokimya Holding A.S.

Construction Period 29 Months (October 2002 - March 2005)

Project Description Turn-key EPC (Engineering - Procurement - Construction) of the plant modifications (supplement, demolition and additions) relevant with revamping project for the expansion of the plant capacity from 400,000 ton/year to 520,000 ton/year ethylene.

PETROKEMYA POLYETHYLENE PLANT *Jubail / SAUDI ARABIA*
Petrokemya - Arabian Petrochemical Company

Construction Period 22.5 Months (October 2001 - December 2003)

Project Description Engineering-Procurement-Construction of 4 industrial buildings with a total volume of 29,149 cubic meters and execution of complete civil and mechanical installation works for construction of new Polyethylene Plant having a production capacity of 500 KTA.

IBN ZAHR POLYPROPYLENE II PROJECT *Jubail / SAUDI ARABIA*
IBN ZAHR - Saudi European Petrochemical Company

Construction Period 22 Months (August 1999 - June 2001)

Project Description The existing Polypropylene Plant (PP I) at IBN ZAHR complex in Al-Jubail, Saudi Arabia was extended by a new plant and associated facilities (PP II) to increase the polypropylene capacity to 320 KTA. G&M&A has executed the turn-key erection of the PP II plant as a subcontractor to Saudi Arabian Parsons Ltd.

ATYRAU REFINERY RECONSTRUCTION PROJECT *Atyrau / KAZAKHSTAN*
Kasymunigas / Kazakhstan

Construction Period 23 Months (January 2004 - November 2005)

Project Description Construction of additional units (gasoline, diesel, naphtha, hydrogen, coke) and renovation works for the Atyrau Refinery.

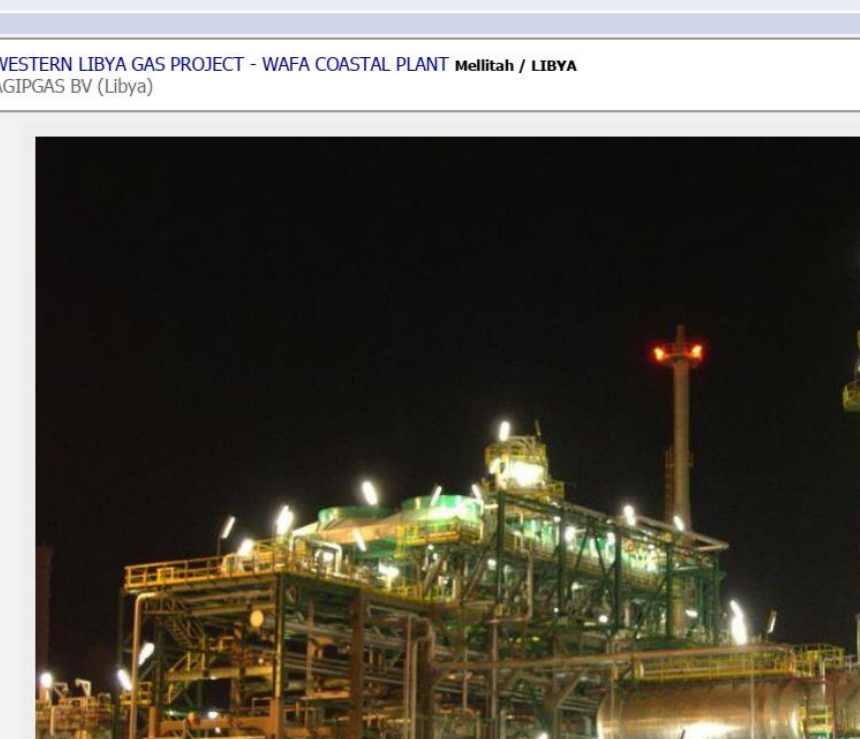

HAWIYAH GAS TREATMENT AND COMPRESSION FACILITIES PROJECT *Al Hasa / SAUDI ARABIA*
Saudi Aramco Oil Company - Saudi Arabia

Construction Period 37 Months (December 2005 - December 2008)

Project Description Execution of all mechanical erection, painting and insulation works in Gas Treatment and Compression Facilities of "Hawiyah NGL Recovery Plant".

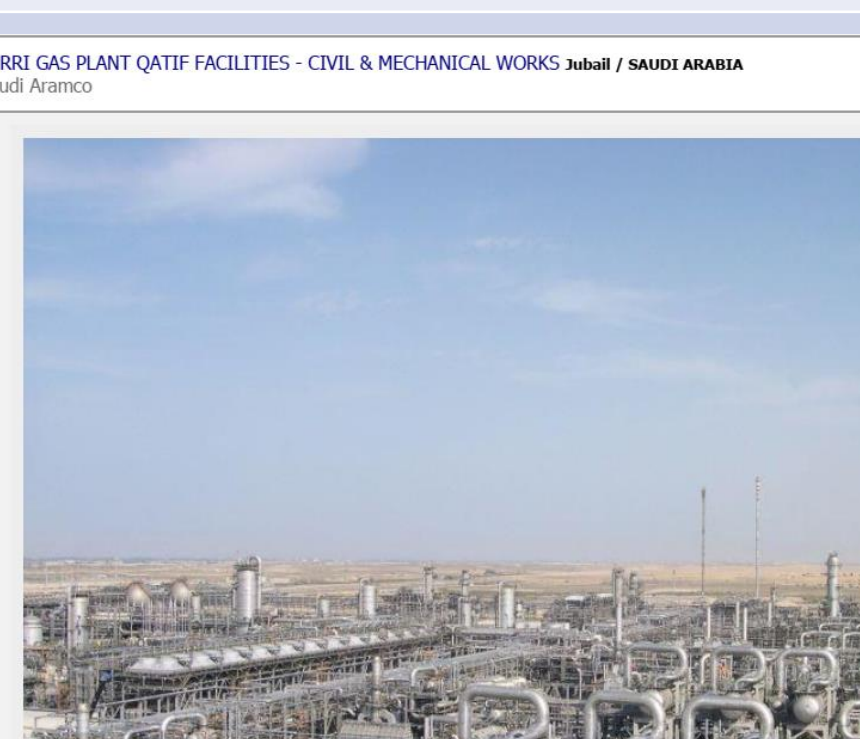

WESTERN LIBYA GAS PROJECT - WAFIA COASTAL PLANT *Mellitah / LIBYA*
AGIPGAS BV (Libya)

Construction Period 25 Months (May 2002 - June 2004)

Project Description Engineering, procurement and construction of 31 buildings with a total area of 28,600 square meters and execution of complete civil and mechanical installation works for the process, utility, underground and off-site areas of the WAFIA Gas Plant.

BERRI GAS PLANT QATIF FACILITIES - CIVIL & MECHANICAL WORKS *Jubail / SAUDI ARABIA*
Saudi Aramco

Construction Period 41 Months (July 2002 - November 2005)

Project Description Construction of new production facilities and revamping of existing facilities including civil and mechanical works.

KASHAGAN MAIN WORKS TRANCHE 1 & 2 PROJECT *Kashagan / Atyrau - KAZAKHSTAN*
AGIP Kazakhstan North Caspian Operating Company N.V. (AGIP KCO)

Construction Period 39 Months (April 2003 - June 2008)

Project Description The project in construction of main pipe rack, oil process units and gas compression unit for tranche 1 and 2 of petroleum process facility under Kashagan Field Development Project - Experimental Program. Scope of project is: supply of all civil works materials, paint, insulation, support and all accessories, execution of civil works, construction of industrial buildings, fabrication and erection of steel structures, prefabrication of piping spools and installation, installation of equipment, painting and insulation works.

SAKHALIN-II LNG PLANT OFFSITE/UTILITY/OET PIPING & STEEL ERECTION WORKS *Sakhalin / RUSSIAN FEDERATION*
Sakhalin Energy Investment Company (SEIC)

Construction Period 44 Months (April 2004 - November 2007)

Project Description Piping and steel erection works for offsite, utility and OET (Oil Export Terminal) areas.

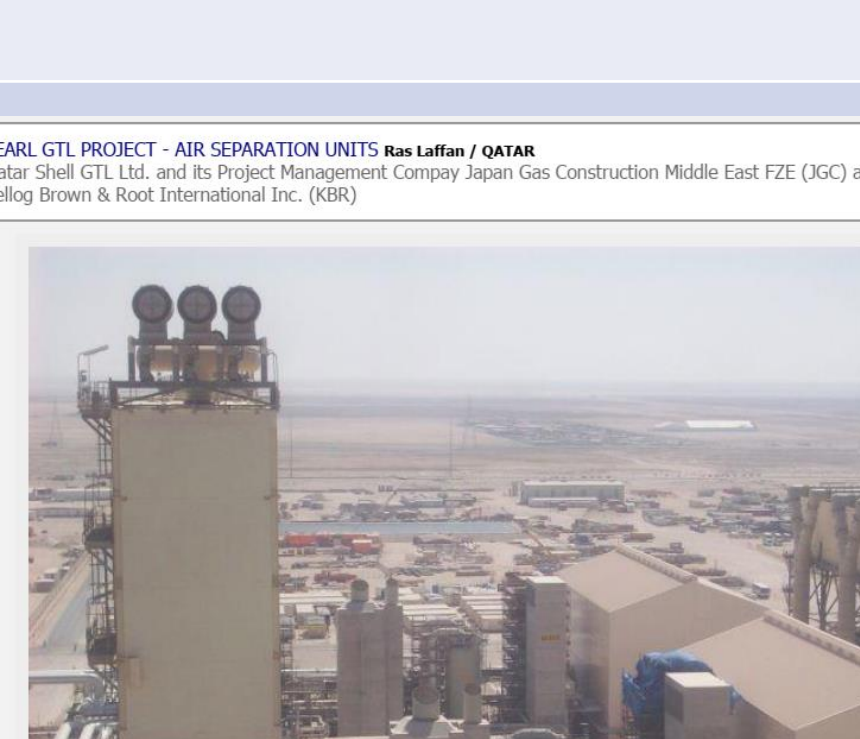

YEMEN LNG PLANT - PROCESS TRAINS 1 & 2 ERECTION WORKS *Balhaf / YEMEN*
YEMEN LNG Company

Construction Period 43 Months (August 2006 - April 2010)

Project Description Execution of all mechanical and electrical installation, instrumentation, piping, painting and insulation works in trains 1 and 2 of the Liquefied Natural Gas Plant in Balhaf - Yemen.

PEARL GTL PROJECT - AIR SEPARATION UNITS *Ras Laffan / QATAR*
Qatar Shell GTL Ltd. and Its Project Management, Japan Gas Construction Middle East FZE (JGC) and Kellogg Brown & Root International Inc. (KBR)

Construction Period 46 Months (June 2007 - March 2011)

Project Description Realisation of all civil and mechanical installation works, commissioning & start-up assistance including operation and maintenance of temporary camp and office facilities for the Shell Pearl GTL Air Separation Unit (ASU) at Ras Laffan Industrial City in the State of Qatar.

QATARGAS 3 & 4 PROJECTS LNG PLANT - CIVIL & ELECTROMECHANIC WORK FOR UTILITIES, OFFSITE & OFFPLOT AREAS *Ras Laffan / Qatar*
Qatargas, Conoco-Phillips and Shell QCS

Construction Period 57 Months (January 2006 - October 2010)

Project Description Execution of civil, electrical & instrumentation, mechanical, painting and insulation works for shop canopies, inlet, waste water treatment, effluent flare, utilities, cooling water/seawater, cooling water pump, sulphur storage tanks and chemical tanks' areas for trains 6 and 7.

QATARGAS 3 & 4 PROJECTS LNG PLANT - CIVIL & ELECTROMECHANIC WORK FOR UTILITIES, OFFSITE & OFFPLOT AREAS *Ras Laffan / Qatar*
Qatargas, Conoco-Phillips and Shell QCS

Construction Period 57 Months (January 2006 - October 2010)

Project Description Execution of civil, electrical & instrumentation, mechanical, painting and insulation works for shop canopies, inlet, waste water treatment, effluent flare, utilities, cooling water/seawater, cooling water pump, sulphur storage tanks and chemical tanks' areas for trains 6 and 7.
